ACADEMIC PROJECTS

MINI PROJECT

Overview of Thermal Power Plant with specific view on Coal Handling Plant and Electrostatic Precipitator.

- In Thermal power station heat energy is converted to Electric Power, water is heated, turns into steam and spins a steam turbine which drives an electrical generator by which electricity is generated.
- An electrostatic Precipitator is an electro-Mechanical device which filters out particles like fly ash, fumes, suspended dirt from air/gas stream before releasing out of a chimney.

MAJOR PROJECT

Disc Oriented Four Wheel Steering Mechanism

- In this mechanism, four wheels are connected to a disc with help of links. This mechanism helps to increase the cornering stability, reduce the turning radius and easy to drive.
- This is useful in off-road driving. We used creo parametric to design the prototype. The four wheel mechanism has already been tried with the help of gears but we tried with links.
- We tested the prototype we got the turning radius of four wheel drive is less than normal drive vehicle.
